

Cordless Blinds

H2H proudly offers A Better Blind exclusively for our stock 2" White Faux Wood Cordless Blinds, the new standard and safest solution for your homes.

The Window Covering Manufacturers Association and the Consumer Product Safety Commission launched a new safety standard for window coverings, requiring most new blinds or shades to be cordless.

WHY CORDLESS?

Children and pets are at risk of becoming entangled in the cords, resulting in injury or strangulation

HOW DO CORDLESS BLINDS WORK?

A wand tilts the slats open and closed.

The blinds are easily raised and lowered by grabbing the center of the bottomrail and pushing up or pulling down.
