

# VERTICAL BLINDS

OPERATION & MAINTENANCE

## TO OPEN

*Rotate the slats by turning the wand until the slats are in the open position prior to sliding the blinds open with the wand.*

## CLEANING

*All of our products are designed to require minimal care and maintenance, but we do recommend that you dust regularly with a soft cloth or feather duster. This will maintain a like-new appearance. For some of the vinyl fabrics or vertical vanes, you can wipe off any dirt or stains with a damp cloth when necessary. You may also use compressed air from a can or the brush attachment from your household vacuum to dust off selected products. **We do not recommend the use of any detergents as this may damage the product.***

## DO NOT

*Do not try to slide the verticals open while the slats are in the closed position.*
